## Modes synchronization

Different Downlights can work synchronously when they are started at different times, controlled by the same remote, under the same dynamic mode and within 100 foot distance.

## Attention

1. When installing the light fixtures, please switch off the power to ensure your safety.
2. Please check whether the input voltage supplied is in accordance with the lighting fixture requirements.
3. Do not dismantle the light fixtures without the aid of an expert, as doing so can cause fire and electric shock.
4. Please do not use lighting fixtures around metal areas and high strength magnetic fields, as it will badly affect the control distance.
